OPERATION AND MAINTENANCE ITEMS

Properly operated and maintained roof runoff facilities is an asset to the farm. Roof runoff facilities were designed and installed to control roof runoff. Estimated life span of this installation is at least 10 years. Facility life can be assured and usually increased by developing and carrying out an effective operation and maintenance program. An effective operation and maintenance program includes:

- ☐ Periodically check gutters, downspouts, pipelines, trash guards, pumps, structures, and appurtenances for proper operation. Repair or replace if needed.
- ☐ Periodically remove debris from facilities.
- ☐ Protect downspouts from damage by livestock, equipment and other hazards. Repair or replace damaged components.
